

Jill was diagnosed with Follicular Lymphoma (NHL) in October of 2004. She has been treated with the following protocols since then: watch & wait, failed vaccine clinical trial, CHOP+R (Chemo) and a Clinical Trial (Rituxan +

# Our Hero, Jill!

*The Leukemia & Lymphoma Society*

In addition to being a TNT Junkie, Jill enjoys travel, the beach, cooking, movies and hanging with friends

## A note from Jill:

I am proud to be a part of the TNT Ironman Team for 2011, since I can't participate – no stamina after this last treatment in 2010 but I'll do my best to inspire you as your Honored Hero.

I'm excited to see all of you accomplish your goal of completing the Ironman while raising awareness & funds to help in the fight against blood cancers. Your effort will help to keep many of the blood cancer patients alive with a true quality of life and provide families the extra support that is so needed/welcomed.

Thanks for all you do – **GO TEAM!!**
